PLANT MAINTENANCE

INDUSTRIAL MECHANICAL CONTRACTORS

OFFERING A DIVERSE PROFILE OF MECHANICAL SERVICES TO WESTERN CANADA

Dice Plant Maintenance has served western Canada as full service industrial mechanical contractor for the last 30 years.

Through our commitment to our clients we have established ourselves as an industry leading mechanical contractor. Dice believes that quality leadership and the right people coupled with integrity and passion creates the right atmosphere for success.

We set high standards for ourselves to ensure we are always meeting and exceeding clients needs and expectations.

It is because of this commitment that companies choose Dice!

Offering a Strong Diversity of Mechanical Services

- Industrial Mechanical & Structural Installation
- Design Build & Specialized Projects
- Maintenance, Shutdowns, Emergency Repairs
- Boiler work & Pressure piping
- Process & Food Process Piping
- Engineering Design & Drafting
- Millwrighting & Welding Services
- Custom Fabrication and Prefabrication
- Equipment Design & Fabrication
- Custom Structural Steel, Stainless Steel, Aluminum

Industrial Installation

Dice provides a full array of mechanical construction, process piping and structural steel solutions for the mining, refining, food processing and industrial manufacturing industries. These include heavy equipment installation and rigging, boiler-work and pressure piping, structural steel, maintenance catwalks/platforms, custom steelwork, process piping, equipment setting, process ducting, mechanical commissioning services, and plant maintenance.

Capabilities

- Process & Power Piping
- Custom Steel & Equipment Fabrication
- Pipe & Skid Prefabrication
- Equipment Rigging and setting
- Structural Steel Installation
- Plant Service & Maintenance
- Emergency Shutdown work
- Code and Specialty Alloy Welding
- Facility Retrofits

Industries Served

- Food & Beverage
- Light Industrial
- Aggregate & Material Handling
- Ore Processing
- Grain and Seed Cleaning
- Wastewater Treatment
- Industrial Manufacturing
- Cannabis & Hemp
- Airport & Baggage Handling

Custom Fabrication and Industrial Prefabrication

To Meet the needs of our clients Dice Plant Maintenance has strategically located their fabrication facility on the outskirts of Calgary in the Patton Industrial Park. Sitting on 3.1 Acres of land our 8,400 sq. ft. is fully functional to meet any clients fabrication needs.

Dice Plant Maintenance maintains full time Quality Control and Engineering staff on site to provide complete document and design control for each project. This includes weld testing and certification, material test reports, procurement documentation, weld map traceability, and sealed engineering drawings as required.

Standards include ABSA manual for pressure piping and boiler erection. CWB certification for SMAW, GMAW, FCAW, GTAW, and client specific requirements. APEGA certification for in house engineering

Additional in-house services include: piping design, scheduling, isometric/spool drawing verification, engineering, 3D Modeling

Facility Highlights

- 5-Ton overhead crane
- Industrial break
- Industrial shear
- Iron worker
- Weld stations
- Segregated & secure welding rod storage
- Positive Material Identification
- Segregated area for non-ferrous fabrication

Quality Assurance Programs

- Client/Project Specific Programs
- CWB Welding to W47.1
- ABSA Pressure Manual (Permit 1523)
- APEGA Permit to Practice (P07615)

Maintenance, Shut Downs, Emergency repairs

Our 24/7 service team consists of certified welders and millwrights that are here to assist you with your routine maintenance and emergency repair needs. They are well stocked and tooled to meet your most challenging service requirements.

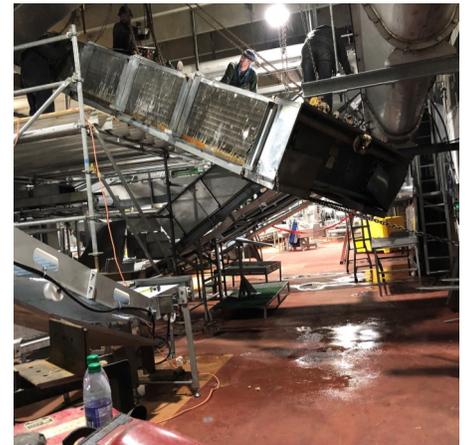

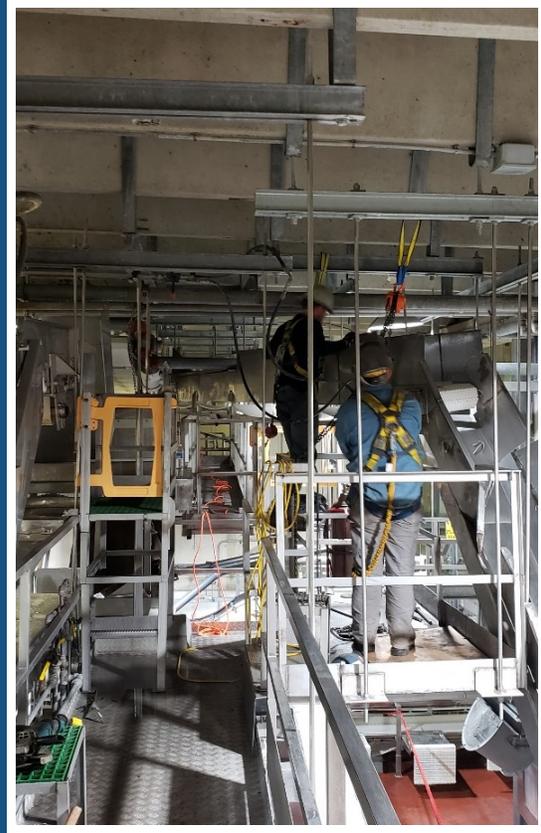

With our client focus and the ability to run around the clock Dice has the capabilities to make sure your operational as quickly as possible.

Boiler Work, Plumbing, Process & Pressure Piping

Carrying a fully certified ABSA manual (Reg, # AQP-1523) coupled with a wide array of approved welding procedures give Dice Plant Maintenance the ability to complete any piping or boilermaker project.

Dice is Currently Authorized to complete the following by ABSA:

- ASME Section VIII-1 Pressure Vessels
- ASME Section 1 Power Boilers
- ASME Section IV Heating Boilers
- ASME B31.3 Indirect Fired Heating Coils
- ASME B31.1 Boiler External Piping
- ASME B31.1 Power Piping
- ASME B31.3 Process Piping
- Fittings Category A, B, C, E
- Fittings Category H

Design Build/Specialized Projects, Engineering

The rapidly changing demands for present day industries requires companies that have the ability to react and adapt quickly. This ensures projects meet or exceed target requirements.

Dice's focus on client needs coupled with our unique skillset allows us to offer fast-tracked, schedule driven projects with the potential to combine services to simplify project management. Whether this be a single trade or a full turnkey project requiring multiple disciplines, Dice has the capabilities to deliver the right solution to fit your needs.

This is achieved through our team consisting of managers, professional engineers, and certified tradesmen, working with an alliance of other like-minded industry professionals.

Food Processing

Dice's humble beginnings started by servicing the food industry over 30 years ago. Since then Dice's extensive experience within the industry has allowed us to develop unmatched expertise for food processors to draw on to aid with design conception, engineering, strategic planning, construction, commissioning and beyond to operation and maintenance. This allows us to deliver products that protect the life cycle of their facilities and processes.

Dice's team based approach to projects promotes collaboration from stakeholders at all levels to ensure projects are delivered in a manner that best meets your needs. This ensures projects are successful beyond completion.

Industries Served

- Primary animal processing (Slaughter) in Beef, Pork, Poultry, Wild Game
- Brewing, Distilling, & Fermenting
- Milk, Cheese, & other Dairy Processing
- Industrial Bakeries
- Distribution centres
- Boxed product storage
- Cold Storage Facilities
- Meat cutting and packaging
- Value added Food Processing
- Milling and grain processing
